Jupiter's Moon Europa  
*HST STIS*

# Europa: The Ocean That Beckons

*“Europa, with its probable vast subsurface ocean sandwiched between a potentially active silicate interior and a highly dynamic surface ice shell, offers one of the most promising extraterrestrial habitable environments, and a plausible model for habitable environments beyond our solar system”*

*- The Decadal Survey*

Most of all Hubble touches all our lives and inspires a diverse community, sharing the wonder, awe and discovery

# Robots and Humans

- All Exploration is Human Exploration
- Robots are great when the job is Dirty, Dangerous or Dull, or when you can't afford to send a human
